OPERATIONS

Founded by Stan Brock in 1985, we at Remote Area Medical are dedicated to preventing pain and alleviating suffering by providing free, quality healthcare to those in need. We strive to reduce barriers to healthcare for uninsured, underinsured, and underserved individuals, bringing critical services to those who might otherwise go without.

We operate pop-up clinics that deliver dental, vision, and medical services—all free of charge. What started as an effort to bring healthcare to remote areas of developing countries like Guyana, Mexico, and Haiti soon grew to meet the overwhelming need here in the United States. In 1992, we held our first U.S. clinic in Sneedville, Tennessee, and have since become a lifeline for communities across the country.

Innovating to Reach More People

At RAM, we are continually breaking barriers to healthcare access:

Telehealth Program: Launched in 2020, our free telehealth services connect patients with volunteer doctors through virtual appointments, providing care directly to patients in the comfort of their homes. We also partner with Knoxville-area nonprofits to bring mobile telehealth clinics directly to those in need. Since the program began, we've provided over \$700,000 in free care. The introduction of a state-of-the-art mobile unit in 2023—equipped with wireless internet, exam rooms, and onboard volunteer nurses—has further expanded our impact. In 2024 we treated our 1,000th telehealth patient and added two telehealth access vehicles to our fleet, which will allow to reach even more underserved communities across Tennessee with free acute care.

Mobile Digital Denture Unit: In 2023, we introduced cutting-edge technology to transform lives through custom dentures. This state-of-the-art unit uses advanced 3-D printing and digital design to restore smiles and confidence. In 2024, the Digital Denture team traveled 3,232 miles and transformed the smiles of 101 patients in eight states, delivering more than \$459,000 worth of denture services to individuals who could not otherwise access it.

A Trusted Name in Healthcare

Our groundbreaking work has earned national recognition and media coverage from outlets like The Washington Post, CBS Sunday Morning, Fox News, 60 Minutes, The New York Times, The Today Show, Matter of Fact, and CNN.

Together, We Can Make a Difference

Every patient we serve and every barrier we break is made possible by people like you—those who believe in a healthier world where everyone has access to the care they need. From our medical volunteers to our donors and supporters, everyone has a role in helping us change lives.

Join us in this mission. Together, we can continue to bring hope and healing to those who need it most.
